

TCP Task Website Development Module

Deadline: Monday, 28th August 2023, 6:00 PM

Greetings !

We hope you have gone through the resources and understood the basics of HTML, CSS, and Javascript, which are essential to build a simple webpage. Now it's time to implement all that you've learned through a simple task. **The task has been divided into two subtasks, with subtask 2 being the bonus task :)**

The first two tasks are scheduled with increasing levels of difficulty and accordingly the points associated with them also increase.

Task 1 :

1. Replicate the **allotted figma file** in HTML and CSS as much as you can. Just hardcode the data as of now. **Download the pictures and assets** from the design itself and use them in your website.

Note: You are not limited to vanilla JS (pure javascript). If you already know any library framework you are free to use it.

Task 2 :

1. Websites on your localhost are no fun. In this task you will host the website on the internet! **You can host it anywhere you like, using any service but if you have never hosted a website before we recommend you to use GitHub Pages which makes it incredibly easy to host your static website.**

Note: Use only free hosting services such as Firebase, Vercel, Netlify.

Submission Procedure :

1. Create a **github repo** under your project name and a branch name with **“tcp_task_2023”**. Make the repository public.
2. Upon completion of the task record a video showcasing the website and upload it to **Youtube/Drive** as an unlisted video.

Selection Criteria Points:

1. Completion of the task fully is not mandatory for selection, we understand the all situations of academics in your respective branches. Your approach, effort and zeal will be the deciding factor in your selection.
2. Bonus points will be granted on clean code, responsiveness of the website (Mobile View) if possible, and deployment to github or any free hosting services.
3. Try to replicate the sketch as similar as possible, this will grant you further points.
4. It is mandatory for everyone to submit their github repo and video link for the selection process.

Deadline: Monday, 28th August 2023, 6:00 PM

Be prepared with the following : (We would ask for it at the time of Deadline)

1. Github Repo Link
2. Youtube/Drive Link (Working Demo Video)
3. Hosted Website Link (If Any)
